**Who We Are**

Fresenius Medical Care is the world's leading provider of products and services for people with renal disease. We serve around 292,000 dialysis patients worldwide and provide products in more than 140 countries. Our goal is not only to treat, but also to innovate, to improve the lives of those impacted by kidney disease.

We were founded to address the global impact of kidney disease by combining medical device engineering expertise with comprehensive patient care. From the beginning, the individuals who use our products and services have been at the center of everything we do. They are our purpose.
