

GLOBAL ENVIRONMENTAL POLICY

WE are dedicated to developing, producing, providing, and applying our products and services in an environmentally sustainable way. By doing so, we strive to continually improve our environmental performance.

WE are committed to business practices that promote the protection of the environment and the minimization of adverse environmental impacts.

WE give top priority to the safety of our patients and employees. We follow these key principles along our value chain:

Compliance and management systems

WE comply with applicable environmental laws and regulations.

WE apply appropriate standards and procedures for our environmental management systems.

WE assess potential environmental risks and mitigation strategies as well as opportunities.

Environmental performance

WE effectively manage the efficient use of energy, water, and raw materials.

WE adopt programs and initiatives aimed at reducing our environmental footprint, including emissions and waste.

WE assess our environmental impact regularly and are committed to developing appropriate targets for our environmental practices.

WE expect our suppliers to comply with our environmental standards as defined in our Global Supplier Code of Conduct.

WE promote collaboration and partnership on topics relating to environmental sustainability.

Innovation

WE foster an open-minded culture of innovation with environmental benefits.

WE promote the development and use of environmentally sustainable products, processes, and services.

WE advocate sharing best-practices and collaboration across sectors.

Communication

WE communicate our progress in the area of environmental sustainability to our stakeholders.

WE foster the awareness and involvement of key stakeholders in environmental issues.
